

FlashPak™ Juices & Beverages

ALWAYS IN GREAT TASTE.

LYONS

DISPENSED JUICE INNOVATION

Lyons takes juice dispensing to a new level with the introduction of FlashPak™ - an exciting innovation in shelf stable juice processing. FlashPak™ takes advantage of Lyons experience and expertise in aseptic processing and packaging technologies, resulting in a unique juice program featuring premium juices and beverages in shelf stable, bag-in-box juice "caddies".

ASEPTIC "FLASH" PROCESSING

FlashPak™ features a proprietary aseptic process, resulting in the highest quality shelf-stable juice in the dispensed industry. Flash heating and cooling ensures:

- Fresh flavor
- Bright color
- No need for preservatives

BAG-IN-BOX PACKAGING

The FlashPak™ flexible bag contributes to the superior quality of the juice you'll serve:

- The bag has superior barrier properties compared to plastic bottles, and also collapses around product as concentrate is dispensed.
- Both of these features limit oxidation, ensuring quality and extending the shelf life of the premium juice.

DISPENSING CONVENIENCE

FlashPak™ features all of the benefits of a shelf-stable container:

- No thawing is required. Pull directly from pantry shelf and load into dispenser.
- The dispensing fitment is compatible with all standard, front-load juice dispensers. The self closing valve means that flavors can be changed for different meal periods and menu needs without the risk of spillage.

PRODUCT LINE

The FlashPak™ line includes a complete offering of 100% Juice Concentrates, Juice Blends, Fruit Beverages, and Teas.

Packaging Specifications	
Packed in 1 gallon bag in box, 3 per case	
Case Dimensions	10.5" x 10" x 13.375"
Case Cube	.8127
Cases Per Pallet	48

ALWAYS IN GREAT TASTE.
